(3) Reasons for the Revision

In this fiscal year, sales of take-out robots remained favorable. Sales of custom-ordered equipment fell below the plan because the delivery was delayed until following fiscal year. As the result, the business forecasts in both consolidated and non-consolidated for the fiscal year ended March 31, 2015 are anticipated to fall below our previous forecasts. Non-consolidated net income is anticipated to exceed the previous forecast because of the dividends from the overseas subsidiaries and tax credit.

The forecasts above are based on the information currently available. A number of factors could cause actual results to differ materially from expectations.
